

# **5 FACTS THAT MATTER**

*Freethinkers Future --- Merciless Truth*

**1. Cops killed nearly twice as many whites as blacks in 2015. According to data compiled by The Washington Post, 50 percent of the victims of fatal police shootings were white, while 26 percent were black.**

- Also, the majority of these victims DID have a gun or "were armed or otherwise threatening the officer with potentially lethal force."
- Through the F.O.I. act, the Bureau of Justice Statistics reveal that blacks were responsible for 62 percent of robberies, 57 percent of murders and 45 percent of assaults in the 75 biggest counties in America, despite only comprising roughly 15 percent of the population in these counties.

***"Such a concentration of criminal violence in minority communities means that officers will be disproportionately confronting armed and often resisting suspects in those***

*communities, raising officers' own risk of using lethal force.*

*'Blacks' commit 75 percent of all shootings, 70 percent of all robberies, and 66 percent of all violent crime in New ^York City for example, even though they consist of 23 percent of the city's population. The black violent crime rate would actually predict that a higher percentage of police-shootings would be black.*

*Officer use of force will occur where the police interact most often with violent criminals, armed suspects and those resisting arrest, which is unfortunately in most black neighborhoods."*

**2. MORE WHITES AND HISPANICS DIE FROM POLICE HOMICIDES THAN BLACKS.**

- 12 percent of white and Hispanic homicide deaths were due to police officers, while only 4 percent of black homicide deaths were the result of police officers.

*"If we're going to have a 'Lives Matter' anti-police movement, it would be more appropriately named 'White and Hispanic Lives Matter'"*

**3. DATA SHOWS IN AUGUST 2015, THE RATIO OF UNARMED BLACK men DYING FROM POLICE GUNSHOTS COMPARED TO UNARMED WHITE men WAS HIGHER; THAT RATIO SIGNIFICANTLY LOWERED BY THE END OF 2015, BUT 'THE MARSHALL PROJECT', LOOKING AT THE DETAILS OF THE ACTUAL INCIDENTS THAT OCCURRED, PAINTS A DIFFERENT PICTURE:**

- The “unarmed” label frequently fails to convey highly-charged policing situations. In a number of these cases, the victim ended up being unarmed, but certainly not for lack of trying. more than five of these black victims tried to grab the officer’s gun, or had been beating the cop with his own equipment. Some were shot from an accidental discharge triggered by their own assault on the officer.
- Also, there are collateral damage cases, like in Virginia Beach for example: Virginia officers approached a car parked at a convenience store that had a homicide suspect in the passenger seat. The suspect opened fire, sending a bullet through an officer’s shirt. The cops returned fire, killing the assailant as well as a woman in the driver’s seat and that woman was entered into the database, without qualification, as an “unarmed black victim” of police fire.
- Another example of "unarmed" - in San Diego, CA and Prince George's County, MD assailants were attempting to reach for a gun in a police officer's holster during an attack on the officer.
- In 2015 three officers were killed with their own guns, which the suspects had wrestled from them during an attack and/or resisting arrest

**4. BLACK AND HISPANIC POLICE OFFICERS are more LIKELY TO FIRE a GUN at BLACKS THAN WHITE OFFICERS. THIS IS according TO a DEPARTMENT OF JUSTICE report IN 2015.**

- And a study conducted by University of Pennsylvania criminologist Greg Ridgeway in 2015 that determined black cops were 3.3 times more likely to fire a gun than other cops at a crime scene.

**5. BLACKS are more LIKELY TO KILL COPS THAN BE KILLED BY COPS. THIS IS according TO FBI DATA, WHICH ALSO FOUND THAT 40 PERCENT OF COP KILLERS are BLACK.**

- Also, a police officer is 18.5 times more likely to be killed by a black person than a cop killing an unarmed black person.
- Despite the facts, the anti-police rhetoric of Black Lives Matter and their leftist sympathizers have resulted in the "Ferguson Effect," as murders have spiked by 17 percent among the 50 biggest cities in the

U.S. as a result of cops being more reluctant to police neighborhoods out of fear of being labeled as racists.

- Additionally, there have been over twice as many cops victimized by fatal shootings in the first three months of 2016. Data, at this time, is only available to this point. Before the more recent assassination of officers.

***Anti-police rhetoric has deadly consequences. Not only do people need to look in the mirror and take responsibility for their actions and their part in the problem before pointing the finger and blaming others, and stop glorifying guns and being a “Thug” or “Gangster”, but the mainstream media also needs to take responsibility for it's one-sided 24-hour barrage of misinformation and agenda pushing on all major news outlets.***

*“The truth isn't always pretty and is not measured by mass-appeal. It just is what it is, whether you like it or not.”*

We were kidnapped, raped, sodomized, tortured,  
and murdered by the people below. Would wearing  
hoodies make us matter to the mainstream media?
